Interest Rates Going Down.

An Eastern loan agency having a ranch in St. Louis reports that many farmers are taking up their loans which draw 7 or 8 per cent and are renexing. them at 5 per cent. This agency is putting money in the states of Missouri and Hinners by the tens of thousands of doliars these days at this rate. Farmers in this region are naturally glad to be able to get money at this low figure, and are taking advantage of the oppor-

Here is a concrete instance of the benetits which Republican sway is bringing the country which will appeal to all persons. The Republican party's victory in 1896 removed the base money menace. The certainty that the Republican party will gain an even greater triumph in 1960 destroys this pent forever and renders the gold standard permanent. This certainty has removed the last vestige of a cloud from the financial sky, restored busicess confidence throughout the country, put large sums of money previcusly hidden in circulation, and thus has reduced interest rates. Hence farm ers and all other borrowers rejoice. Under the happy conditions which the

sway of the Republican party has brought, the farmers of the West can borrow money at almost as low rates as are prevalent in the Atlantic states. Money lenders and business men in gen eral now begin to see that that combination of Populism and Democracy which ran the Chicago convention of 1856 and put up Bryan has lost its hold on the Western states which it carried three years ago. The election last November, in which the Republicans won several states west of the Mississippi which went to Bryan in 1806, is helping the farmers of this region, as well as bene fiting the country in general. Base money has no footing in this part of the country or in any other any longer. The to be made by Tim Suxcitation the tree Trotting Stallion, Populist outbreak of 1830 and the half campaign against Stubios at Williams a dozen succeeding years and the anar- because of excessing costs in the circumchistic and socialistic eruption in the court as it channel. We notice by the City Chicago convention of 1896 damaged the published statement that the liest form West by making the rest of the country under the new Republican prosecuta believe that this region was committed attorney cost morely almost while hash irrevocably to these follies. Hence the April and August terms of last year money was withdrawn from the West cost only little over solt. wherever possible, and the farmers and Courier. all others who wanted to borrow suffered. The above is about as a arms as a consequence. The turn in the tide the Courier ordinarily gets. The country has come, however. The Republican statement referred to shows that the victory of 1836 is now seen to be certain cost of the April and Among terms of of repetition in 1900. Financial confid. circuit court last year cart was a sortion ence, therefore, is unbounded. Money stead of \$700, Why does not she United is plentiful and cheap, and farmers and compare the cost of the danners form others rejoice. The Republicans will last with Messrs, Stubbs and Williams make great gains in the agricultural dis. January term, 1865. Why discount the DR. PORTER is a few with black points, weight 1.50 points. Sied by Kentucky Jewell, 1578 | the by Kentucky Prince, 1370 | by Clark 150 points all over the country in 1900, but particularly in the Western states.

So much is said nowadays about this method of taxation that THE SENTINES. presents to its readers a concise state ment of the theory from one advocate of the alca. It is interesting enough to re-

1. It is easily understood because it involves the collection of as its name implies but one tax, and that upon the yearly ground rent of any and every piece of land, not including the value of any improvements that may be in or upon it. In ather words, the single tax proposes to collect for public revenues the amount that any piece of land will rent for every year, and abolish all other forms of taxation.

2 It is not complicated, because nothing else but the bare land value will be taxed, and that is the most easily obtained of all value.

3. It is the natural tax, the true surce of public revenue, because land values are due to the presence and industry of the entire community, and are not the result of individual exertion. 1. It is just because it would fall on

everyone in proportion to the value of the land occupied. Land baying no value would pay no tax; land having a high value would pay a high tax, but always in proportion to its value, not its area. This would be in keeping with the true principle of taxation, which is, that taxes should be levied, not according to ability to pay, as is done now, but in proportion to benefits conferred by government, and these benefits are always measured by the value of land. The better the government the higher the land value, and those who enjoy the greatest benefits of good government

should pay the most. 5. It is certain. Unlike the present system the single tax cannot be evaded, nor can it be shifted. Land hes out of doors and is readily accessible and can- of R. C. Benton. i. C. read and also the day freight
